

Introducing our new...

ALL-IN-ONE

Digital Marketing Platform

This powerful, user-friendly platform is packed with must-have tools to put you on the digital map, generate leads, and centralize all your marketing activities!

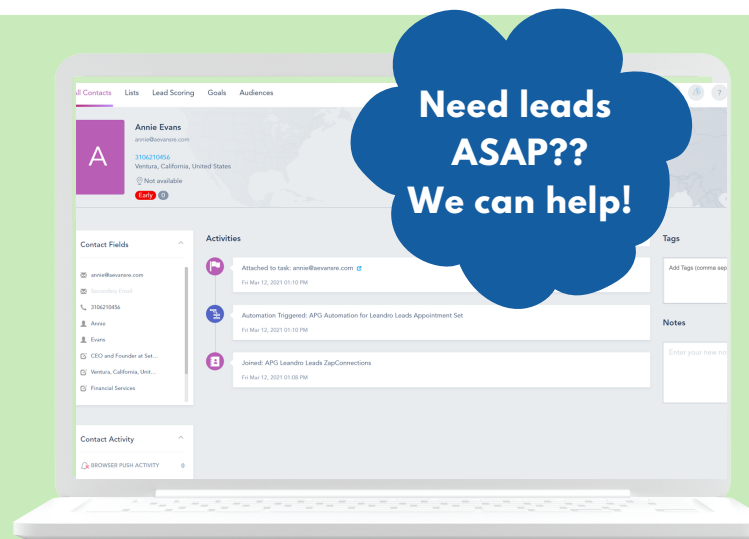

AUTOMATION

Our **Tymbak** marketing automation platform enables you to execute multiple marketing tasks and manage cross-channel activity in an easier, faster, organized fashion.

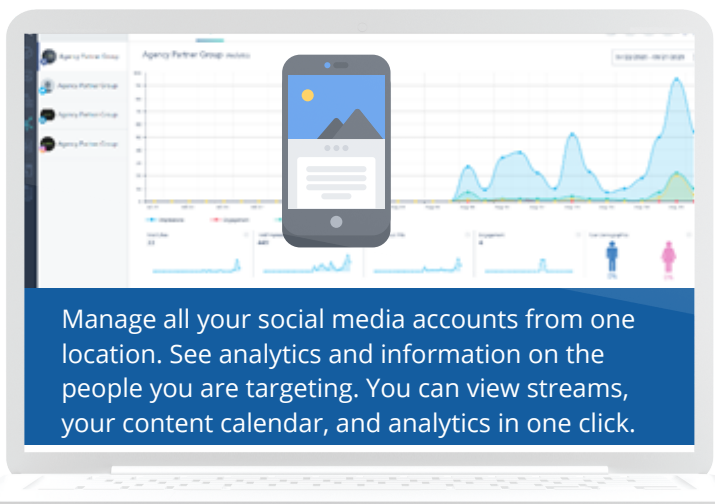

LEAD GENERATION

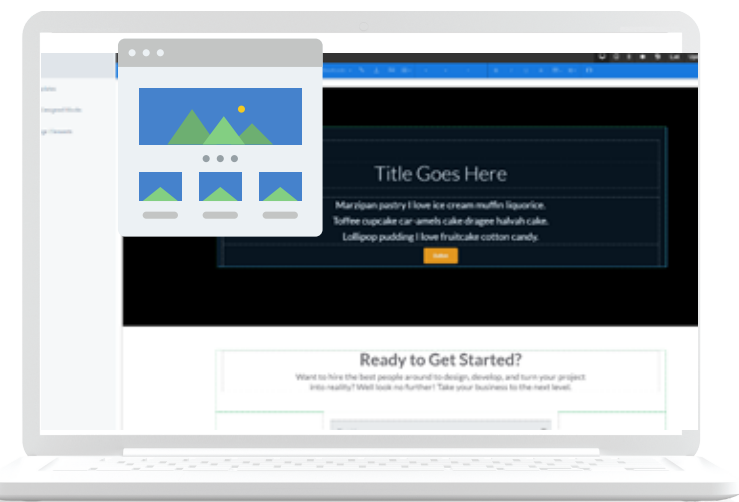

The #1 objective of this platform is lead generation: the process of attracting prospects and converting them into clients. As you capture new leads, they will be piped into your CRM. There, they are scored and tracked from their first website visit to their last engagement with your marketing channels.

SOCIAL MEDIA MANAGEMENT

You need a robust digital presence to drive traffic and create brand awareness. You may have social media accounts but do you have the bandwidth to compose engaging content and regularly post? Enjoy access to a library of customizable posts, updated daily; easily schedule posts across your preferred channels. ***Set it and forget it; track your impact!***

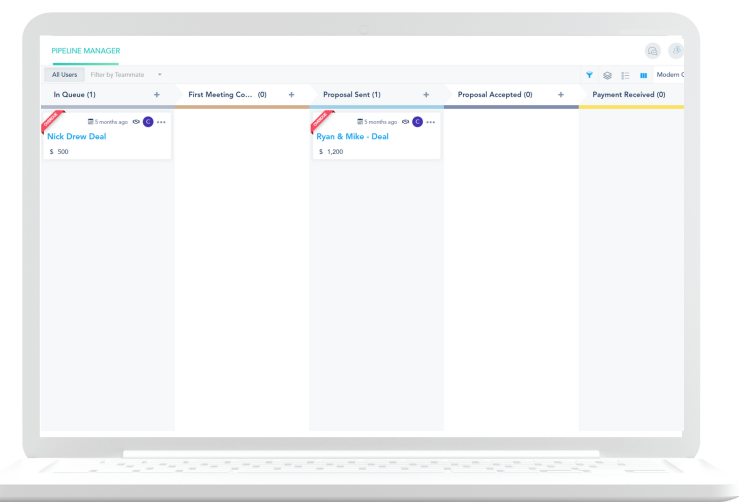

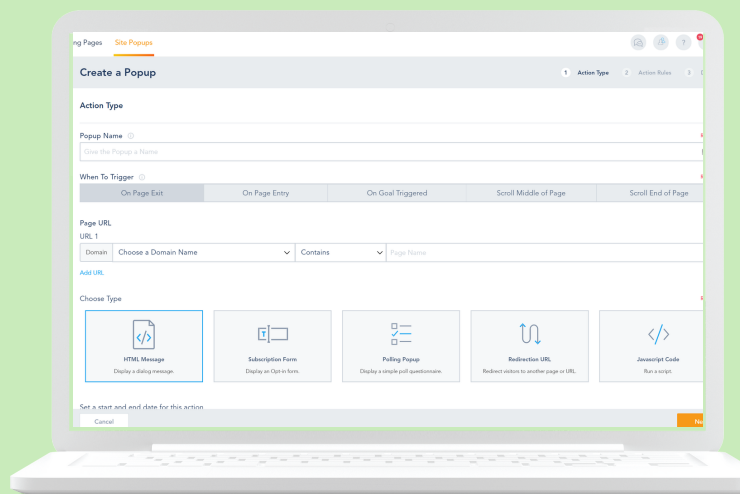

LANDING PAGE BUILDER

A standalone web page, a landing page is distinct from your homepage. Your marketing will drive prospects to it, encouraging them to take action. Easily build responsive landing pages with our templates or create your own. Set your page to dynamically change with visitor data. Use the page's analytics to measure the impact of your marketing campaigns.

EMAIL MARKETING

With pre-built templates, easily design engaging, personalized emails that demonstrate authority and strengthen relationships. Elevate your emails with included dynamic content: animated GIFs, stock photos, countdowns, CTA buttons, and “add-to-calendar” events. Automation makes it easy to schedule emails, track open/click rates, and manage unsubscribes/bad email addresses.

PIPELINE MANAGEMENT

This feature enables you to track and manage each sales opportunity through every stage of the conversion process to a successful close. With clear insight, you can assess your marketing efforts and pinpoint where impactful improvements can be made.

LEARN MORE!

We had a series of webinars to introduce this platform. Here is a recording of one of them:
