Have you thought about it this way before? You insure your other valuables – be sure to cover your ability to make a living too.

This is a common misconception people have when thinking about whether they need to protect their paycheck with disability insurance. But the truth is, illness – not

[#DisabilityInsurance](#) is a type of policy that protects you against loss of income when an insured is unable to [#work](#).

[https://www.gpagecy.com/wp-content/uploads/graphic\\_DI\\_realitycheck\\_your\\_most\\_valuable\\_asset\\_1200x1200\\_branded.jpg](https://www.gpagecy.com/wp-content/uploads/graphic_DI_realitycheck_your_most_valuable_asset_1200x1200_branded.jpg)

accidents – account for most disabilities that keep people out of work.

That's why there's disability insurance. If you were sick or injured and unable to work, it would replace a portion of your paycheck until you could work again. Think of it as insurance for your paycheck.

Life can happen in an instant, so protect your financial future with disability insurance.

*"I can rely on Workers' Compensation if I got sick or injured and couldn't work."*

It's true that states require employers to provide Workers' Compensation coverage, which typically pays about two-thirds of your pre-disability income. But it only pays in cases where your illness or injury is related to your work. The vast majority of long-term disabilities are not job-related.

That's where disability insurance comes in. It would replace a portion of your paycheck until you could work again. Think of it as insurance for your paycheck.

<https://www.gpagecy.com/wp-content/uploads/Di-man-in-factory.png>

*"I'm young and healthy. I don't need disability insurance."*

The fact is that one in four of today's 20-year-olds will become disabled at some point in their career, according to the Social Security Administration. That's a pretty big risk to take. How long would you be able to meet your rent or mortgage, car payments, bills and other monthly expenses if you couldn't work?

Disability insurance is there for just that reason. If you were sick or injured and unable to work, it would replace a portion of

your paycheck until you could work again. Think of it as insurance for your paycheck.

<https://www.gpagency.com/wp-content/uploads/Young-dont-need-DI.png>

*"I don't need disability insurance because I have it through work."*

Disability insurance through your job is a great benefit, but make sure you find out what type of coverage you have. Is it short-term, long-term? How much of your paycheck does it cover and for how long?

Remember, if you were sick or injured and unable to work, it's your disability insurance that would replace a portion of your paycheck until you could work again.

Make sure it's enough to help you make ends meet. If not, consider an individual disability insurance policy.

Why is disability insurance important? Your ability to earn a living is your most important asset. And one of the best ways to protect it is with disability insurance.

Think of it as insurance for your paycheck. Disability insurance provides you with a percentage of your income if an illness or injury prevents you from working and earning a living. You don't hesitate to insure your home, car, and phone, so why wouldn't you also protect what pays for all those things? —your paycheck.

Reminder

**Protect your most valuable asset - your paycheck.** 💰
